

GLUCOMETER COMPETENCY RENEWALS***

The following is a process for renewing your competency:

1. **Watch the glucometer power point** that is posted on the Staff Dev (SD) MRCH intranet page: “Glucometer PowerPoint.”
2. Print out and **complete the glucometer quiz** that is also posted on the Staff Dev (SD) MRCH intranet page: “Glucometer Competency Exam, 2021-2022.”
3. **Self-correct your quiz.** The quiz key also is available on the SD MRCH intranet page. Note: Your answers do *not* need to contain as much explanation as the quiz key answers, but should contain the major points. If you need to rewrite an answer, it’s fine to cross out the old answer and write the new one; just please make sure it’s readable. *If you use the quiz key to help learn items, please make sure you understand them! Thank you!*
4. Preferably after watching the power point and self-correcting your glucometer quiz, demonstrate a finger stick.

Note: To **arrange to do an observed finger stick:**

- (1) Please call the lab’s glucometer staff person, Brenda Eury at MRCH extension 3199 (“glucometer hotline”). If Brenda does not answer, please leave a message; Brenda monitors her phone. OR
- (2) If you cannot reach Brenda, you also may check to see if Suellen in Staff Development is available to observe a finger stick, by calling the SD office at x3119.

5. Hand in your quiz to the lab.

With questions, please call Brenda Eury x3199, or Staff Development x3119.

Thank you.

March 2021

*** These instructions also are appropriate for any new nurses who do not attend New Nurse Orientation (such as travelers).
